ABOUT ME

I am a dedicated PHP Laravel developer with over 2 years of experience primarily working on Laravel and CodeIgniter and designing, developing, and maintaining robust web applications. With hands-on experience in frontend technologies like Bootstrap, Tailwind CSS, JavaScript, jQuery, and ReactJS, I excel in creating responsive and user-friendly interfaces. I possess a strong understanding of MVC architecture and RESTful & 3rd Party APIs. I strive to continuously learn and improve my skills in web development.

WORK EXPERIENCE

Enzipe

Dec 2023 - Till Date | PHP Developer

At Enzipe, we are working on multiple projects of different niches comprising of daily use

tools of documents , images and educational tools

PROJECTS

Final Year Project : Smart Batch Advisor
My FYP was a course registration system developed in (M)ERN stack using MySQL as DB. Students would have courses shown on their portal depending on their previous results , and after sending request to their concerned batch advisors, they will approve or reject their courses.
ZOOM MORE A video conference App in which you can have a duo, conference video, and audio calls with anyone available on the Video-Meeting app. I used Jitsi video calling SDK.
Immune Laboratory I developed the Clinical Laboratory System using PHP,MYSQL and Bootstrap as a Semester Project

Zombie Runner
3D FPS game made in UNITY and C# language as a Game Development Course Project
